# CTCAO REQUEST PROCESS (REQUESTER POV)

A resident or another city office files a request online — no account needed — and follows it with a tracking number and QR until it is Done. Every request goes directly to the City Tourism, Culture and Arts Office (CTCAO).

**1** Open a browser and go to the **SPeED TraQR** website

↓

**2** On the homepage, click **"Submit a request"**

↓

**3** Pick the **CTCAO request type**, then fill in your name, email, mobile number, purpose and details

↓

**4** Filing for an office or barangay? Fill in **Office or organization**. Quantity is optional for services (layouts, social media posts, assistance)

continues →

**5** Answer the **extra question** (e.g. venue for events set-up, size for layout). Reserving City Plaza or Gateway Park? Pick dates & times — a taken slot is refused right away

↓

**6** Upload the listed requirements, tick the data privacy consent and submit

↓

**7 Save tracking number (SPD-...) and QR code** on receipt page. The same details arrive by email; a claim slip can be printed if needed

continues →

**8 Track anytime**: homepage → "Track a request", type the number or scan the QR. The page shows the stage (**Pending** → **Ongoing** → **Done**) and CTCAO handling

↓

**9 Ask Speedy** (the chat bubble) any question. Real replies from CTCAO are in "Office messages", after confirming your email or mobile

↓

**10 Returned for revision?** You get an email with the reason — re-upload only the requirement that was flagged

↓

**11 When it is Done**: finished services clearly say **Done** directly on tracker. For borrowed items (flags, banners), bring your QR to CTCAO to collect

**Emails along the way:** received · **Ongoing** (accepted by assigned staff) · **Done** (finished or items released) · **Returned for revision** · **On Hold** (when waiting on you). Borrowings also get: booking confirmation, pickup notification, overdue reminder, returned receipt.

# CTCAO REQUEST PROCESS (OFFICE POV)

The supervisor (S/Admin) confirms assignment with usual handlers pre-selected; the assigned staff member accepts, does the work and finishes it. Supervisors receive instant bell and email notifications at each milestone.

## SUPERVISOR (S/ADMIN)

**1 Log in** — a new request rings the bell and raises the Dashboard badge

↓

**2** On **Dashboard** → **Unassigned**, click Review to see the details, purpose and requirement files

↓

**3 Assign staff** — the usual person for that request type is already pre-selected! Confirm or reassign — or Deny it (needs a reason; final)

↓

**4** Follow it under **Ongoing**; finished ones move to **Done**. Admins receive bell & email alerts when staff accepts and finishes

hands it to staff →

**Supervisors (S/Admin):** Maria Santos, Carmela Torres, and Dennis Aquino.
**Other staff:** Tess Gomez, Leo Pascual, and Ella Manalo.
Usual handlers can be adjusted anytime on the Request Types page.

## STAFF (ASSIGNED)

**1 Log in** — the request is on your Dashboard (badge, bell and email)

↓

**2** Open it and **Accept it** — status becomes **Ongoing** and supervisors get bell + email! (Or Decline / Request revision)

↓

**3 Work on it**; add work notes or attachments as you handle the tourism request

↓

**4 Verify each required document**, and approve any reservation/booking

continues →

**5 Anytime**: Adjust Date, Hold it if blocked (SLA paused), Move back with reason, or message requester

↓

**6** Click **"Finish request"** (optional note) → Status becomes **Done**. Supervisors and citizen get an instant email!

↓

**7 Borrowed items handover**: scan QR on Resources page and click **Release** — handing over items also automatically marks the request **Done**

**Automated Milestone Notifications:**
Supervisors receive an on-screen bell notification and email when: (1) Staff accepts (status: **Ongoing**), and (2) Staff completes work (status: **Done**).

# BORROWING & RESERVATIONS (FLAGS, BANNERS, VENUES)

A borrowing or venue reservation follows the same request steps — plus its booking, which is run on the Resources page (the lending desk), the Booking calendar, or the Reservation card inside the request's Review window. The two move together.

**1** Supervisor assigns request and staff member accepts it (**Ongoing**). Until then the booking cannot be approved

↓

**2 Approve booking** and enter quantity lending (whole numbers). Checked against CTCAO stock (Spider Banner, Flags). Not enough stock or venue booked? Refused — lend fewer or move date

↓

**3** Only now can request proceed. Stock shows as promised (e.g. 20 owned → 15 available). *Flag requisitions (to keep) do not deduct stock*

continues →

**4 Pickup day: Hand over on Resources page** — or Release at counter by scanning QR. Handing over items automatically marks request **Done**!

↓

**5 Items come back: Record return** — how many came back, how many damaged, how many missing. Some still out? Stays on loan

↓

**6 Everything back → loan closes**, stock is restored, and requester gets a thank-you email

if it runs late →

**7 Past return date and not marked returned → Overdue**. Items stay counted as out — nothing returns to stock by itself

↓

**8** System emails borrower and bells staff member & supervisor every 3 days until back. Staff can also Send reminder

↓

**9 Need it longer? Change return date** — checked against what is already promised to the next borrower

**Moving claiming date moves the booking:** Pickup Oct 20–24 moved to Oct 25 becomes Oct 25–29 on calendar, re-checked against stock. Rescheduling on calendar moves claiming date too. Denying a request frees its items or venue immediately.

**The requester sees it too:** a "Your borrowing" card on the tracking page — Waiting for confirmation · Confirmed, pick up on … · With you, return by … · Overdue by N days · Returned. If fewer were confirmed than asked, it says so clearly.

# THE STAGES AT A GLANCE & CTCAO CATALOG

What each stage means under the streamlined CTCAO workflow (Pending → Ongoing → Done), what lets a request move forward, and the official request assignment table.

| STAGE | MOVES FORWARD WHEN | CITIZEN IS TOLD |
|---|---|---|
| Pending | Supervisor assigns it and assigned staff accepts it | Received, waiting to be picked up |
| Ongoing | Staff accepts request; works on service, verifies documents, approves booking | A staff member is working on it (email notification) |
| Done | Staff clicks **"Finish request"** (or borrowed items handed over on Resources) | **Done** (email). Finished services display Done directly on tracker |
| Returned | Requester re-uploads flagged requirement document | Something needs correcting (email) |
| On Hold | Staff resume it (deadline SLA clock paused meanwhile) | Paused, waiting on something (email if on citizen) |
| Denied | Final — supervisor's decision, with mandatory reason | Could not be approved, with reason |

**Key CTCAO Workflow Features:**
- **Simpler 3-Stage Progress:** Pending → Ongoing → Done replaces the old 5 stages.
- **Office or Organization Field:** Another city office or barangay can file through the same form.
- **One Extra Question per Type:** Venue for events set-up, size for layout, etc.
- **Service Quantity Optional:** Requisitions/services do not force item counts.

## REQUEST TYPES & USUAL HANDLERS

| REQUEST TYPE | USUALLY HANDLED BY |
|---|---|
| City Plaza reservation | Ana Cruz (Jhacky Ong) / Bea Santiago |
| Gateway Park reservation | Ana Cruz / Bea Santiago |
| Other venue request | Ana Cruz / Bea Santiago |
| Events set-up | Mark Dizon (Sergio Machado) |
| Spider banner borrowing | Ana Cruz |
| Philippine flag borrowing | Ana Cruz |
| Philippine flag requisition (to keep) | Ana Cruz |
| San Pedro seal flag borrowing | Ana Cruz |
| Lei making | Mark Dizon |
| Layout request | Joy Navarro (Jezther Ygnacio) |
| Social media posting | Kevin Ramos (Michael Tabuyan) |
| Program assistance | Mark Dizon |

**Supervisors (S/Admin):** Maria Santos, Carmela Torres, Dennis Aquino.
**Other Staff:** Tess Gomez, Leo Pascual, Ella Manalo.
*Other offices' request types (business permit, cedula, etc.) are switched off for now.*

# INTERNAL REQUEST PROCESS (FILING OFFICE)

Any staff member or supervisor can file a request from their office to another office. The request gets an **INT-** tracking number and a QR code. Only the **first** office is chosen when filing; each office that handles it picks the next one.

**1** **Click "File Request"** at the top of any page

**2** **Fill in** the required fields: the **first office** it goes to, **what is being requested**, the **signed paper** (PDF or picture: JPG, PNG, WEBP), and the **"Has a hard copy"** switch

**2A** Hard copy switched **off**? **Choose who** at the first office receives it

**continues →**

**3** **Click "Review"** and check the summary

**4** **Drag and resize** the QR on the scan to place it. For a PDF with several pages, **pick the page**

**5** **Click "File Request"**. The INT- number is created, a **QR-stamped copy** of the scan is saved with the request, and the first office is notified

**then →**

**HARD COPY**

**6** **Print the QR sticker**, stick it on the paper and **carry the folder** to the first office

**SOFT COPY**

**6** Nothing to print or carry. It is **already with the person you chose**, who is notified

**7** **Follow it** on the **Internal** page (the "Filed" list). The bell rings when an office **receives** it and on every **decision**

**Returned to you for revision?** Fix it and **Resend**, or **Withdraw** it. See page 4.

**Word files can't be filed.** The QR has to be stamped on the scan, so save or scan the signed paper as a PDF or a picture first.

# HARD COPY (PAPER FOLDER WITH QR)

The paper travels from office to office. Each office **scans it in** when it arrives, and nothing can be decided until it has. Anyone at the office can scan it in, but only the office's **supervisor** decides.

## ANY STAFF AT THE OFFICE

**1** **Receive** the folder by hand

**2** **Click "Scan QR Code"** at the top and point the camera at the sticker. **One scan** opens the request **and logs it as received**. The filer is notified

**3** Sticker torn or no camera? On the request, **record it manually** with a reason. It is logged

hands it to the supervisor →

## SUPERVISOR OF THE OFFICE

**4** **Open** the request (bell, **Internal** badge, or scan it). The decision card shows once it is received

**5** **Approve**: choose the **next office**, **scan the folder's QR** again, and your **e-signature** is added. Then **carry the folder** there

**6** The next office **scans it in** (step 2) and decides the same way. This repeats for every office

continues →

**7** The last office clicks **Done** (with a scan): the request is **Completed**

**8** Or: **Return** it to the filing office for revision, or **Deny** it (final). Both need a **reason** and a scan

**Before approving**, register your e-signature on your **Profile** page. Return, Deny and Done don't need it.

**Every decision needs the folder:** scan its QR, or write why you can't. The reason is logged.

**Paper is received by camera only.** A picture or screenshot of the QR proves someone has the file, not that the folder arrived, so it opens the request without logging it as received.

# SOFT COPY (NO PAPER, QR ON SCREEN)

Nothing is carried. The request goes straight to a named person at each office. It still has to be **received** before anyone acts on it: the person (or their supervisor) reads its QR on screen.

**1** The **named person** and their **supervisor** get the bell. The Internal badge counts it

**2** **Open** it and **Receive** it: **"Select the QR on screen"** dims the page, then **drag a box** around the QR. No permission prompt

continues →

**2B** Other ways to receive: **"Scan QR Code"** at the top (camera or a saved picture), **"QR open in another window?"**, or **"Choose a saved picture"**

**3** Received: the status changes from **Awaiting receipt** to **Under review**, and the filer is notified

continues →

**4** **Approve**: choose the **next office** and the **person there**. Your **e-signature** is added. No folder to scan

**5** That person receives it the same way (step 2). The last one clicks **Done**; anyone along the way can **Return** or **Deny** with a reason

**Only the person it was sent to, or their supervisor,** can receive or decide a soft copy. Colleagues at the same office can see it but can't pull it onto their desk.

**Where is the QR?** Next to the tracking number on the request (click it to enlarge), and on the QR-stamped copy in its Files. A phone camera can also open it on the public tracker.

# RETURNED REQUESTS & STATUSES

A returned request waits on the office that filed it. The filer, or anyone at that office who can file requests, picks one of two actions. Both show on the request under **"Returned to your office"**.

**R1 Read** the reason from the office that returned it

↓

**R2 Resend**: say **what you changed** and attach a **revised scan** if there is one

↓

**R3** It goes back to **the office that returned it** (a soft copy, to the same person), which **receives it again** before deciding

**OR, INSTEAD OF R2**

**R4 Withdraw** it (optional reason). The request closes as **Withdrawn**; whoever returned it is notified

| STATUS | MEANS |
|---|---|
| Awaiting receipt | Sent to an office; nobody there has scanned or received it yet |
| Under review | Received; the office is deciding |
| Returned for revision | Back with the filing office to fix and resend, or withdraw |
| Completed | An office clicked Done |
| Denied | An office refused it, with a reason (final) |
| Withdrawn | The filing office closed it after a return (final) |

## GOOD TO KNOW

- **Internal page** (sidebar) lists what is waiting at your office, what your office filed, and what has closed.
- **Badges** count only work waiting on you: requests at your office, soft copies sent to you, paper not scanned in yet, and returns to fix.
- **Public tracker** (sign-in page → "Track a request", or a phone camera on the QR): status, the office holding it and who is handling it. Never the purpose, remarks or files.
- **Reports** flag a request held at one office longer than that office's turnaround (72 hours unless set otherwise).
- **Every step is logged**: who scanned, received, approved (with the signature), returned or denied, and when.
- **Citizen requests (SPD-)** are separate: they never appear on the Internal page.
